# Rock Drilling Hammers and Bits

Numa is the world's leading manufacturer of rock drilling products dedicated to ongoing innovation and results-oriented consistency. We've built a strong legacy of high quality, Made in the USA hammers and bits for drilling holes 3½ -50½ inches (89 -1283 mm) in diameter.

Foremost to the success of our customers is Numa's personal service and technological expertise.

We work with drillers on job sites around the world to support our products and gain first-hand insight for advancing rock drilling product design to satisfy every drilling environment.

## SMALL HAMMERS AND BITS

Drills holes from 3 ½" to 10" (89 - 254 mm)

- Twelve hammer models designed for unique applications
- Hundreds of bit configurations for diverse drilling conditions
- Built for longevity and fast penetration rate
- Drill at high frequency and requires minimal air
- Exceptional performance against high heads of water
- Easy maintenance due to only 8 major hammer parts

## DTH PRODUCTS BUILT FOR YOUR NEEDS

Numa provides unparalleled customer support before, during and after your drilling project. Our years of experience working directly with customers on job sites means we consider your needs for every product we design. Some of the many benefits Numa customers enjoy from our Small Hammer & Bit models include:

- Mining & Quarry: Reliable performance in various formations and conditions
- Water Well: Consistent and fast drilling, day in and day out
- Oil & Gas: Tough, dependable, proven deep hole drilling
- Construction: Configurable designs for specific needs
- Geothermal: Fast penetration rates in deep, hot drilling applications
- Horizontal: Efficient hard rock borehole drilling
- And many more...

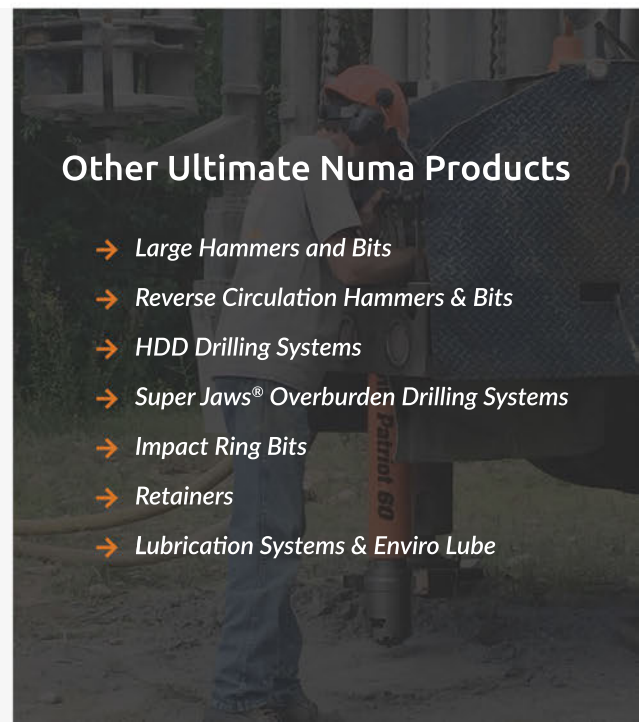

## The Ultimate Rock Drilling Technology

Join the growing list of Numa customers experiencing the highest value in products, performance, and service in the drilling industry.

- Designs based upon 40+ years of experience with drillers
- Made in the USA quality and dependability
- Onsite and remote technical and product support
- Configurable designs for every drilling need
- Dedicated, in-house engineering team
- Fully tested products that come with Numa's Quality Test Certificate

## Other Ultimate Numa Products

- Large Hammers and Bits
- Reverse Circulation Hammers & Bits
- HDD Drilling Systems
- Super Jaws® Overburden Drilling Systems
- Impact Ring Bits
- Retainers
- Lubrication Systems & Enviro Lube

### FLAT

Provides good performance in medium to hard formations. The strongest face design producing durable, long lasting drilling.

### CONCAVE

Provides consistent drilling in all formations. The cone shaped depression in the face has piloting effect to drill straighter holes.

### CONVEX

Provides fast penetration rates in hard and abrasive formations. Face design allows for increased body support for gauge carbide.

### SPHERICAL

Provides best overall performance in granite hard rock and granite formations. Known as the strongest carbide for deep hole drilling.

### BALLISTIC

Provides fastest penetration rates in soft/medium, less abrasive formations. Produces larger spoils/cuttings.

### DOUBLE DOME

Provides best performance in limestone and sandstone formations. Much stronger than ballistic and still performs when not sharpened.
